

DOUGLAS HAYES MENUEZ

CURRICULUM VITAE

2014

BIOGRAPHY

Douglas Hayes Menuez (b. 1957) is an award-winning photographer based in New York City. While his varied career over 30 years has ranged from photojournalism to commissioned work and fine art projects, his methodology has evolved to employ a traditional documentary approach that allows for his subjective interpretation of the story. The driving concern of all his work is to explore and reflect the realities of the human condition.

His career as a photojournalist began in 1981 at *The Washington Post* and then as a freelancer covering a wide range of stories for *Time*, *Newsweek*, *LIFE*, *USA Today*, *Fortune* and many other publications worldwide. His subjects have included the homeless crisis, the Ethiopian famine, Oakland drug wars, the Olympics, and the AIDS crisis. He gained exclusive, unprecedented access to record the rise of Silicon Valley from 1985-2000 and documented the private daily lives of its most brilliant innovators, including Steve Jobs, Bill Gates, John Warnock, Carol Bartz, Andy Grove, John Sculley, Bill Joy, and John Doerr during as they invented the technology that changed our world.

His many portrait assignments range from cultural notables such as Charlize Theron, Cate Blanchett, and Robert Redford, to Mother Tereza and Presidents Clinton and Bush, Senior. Menuez' work has won numerous awards over the years and been honored by many organizations, including the Kelly Awards, The AOP London, The Cannes Festival, The One Show, The Art Director's Club of NY, Photo District News, The Epson Creativity Award, American Photography, the International Photography Awards, NY Photo Festival, Graphis, and Communication Arts.

Menuez has been exhibited in solo and group shows and has also been featured in nine of the bestselling *Day in the Life* books. His commissioned campaigns for global brands include Chevrolet, Emirates Airlines, GE, Siemens, GE Hewlett Packard, Coca Cola, Charles Schwab, Nikon, Chevron, Nokia, Samsung and Microsoft.

Menuez' books include the bestseller, *15 Seconds: The Great San Francisco Earthquake of 1989*, co-produced with David Elliott Cohen, which generated more than five hundred thousand dollars in relief money for earthquake victims. Three of his personal documentary projects have been published as books to date: *Defying Gravity: The Making of Newton*, Beyond Words Publishing, 1993, *Heaven, Earth, Tequila: Un Viaje al Corazón de México*, Waterside Press, 2005. His book *Transcendent Spirit: The Orphans of Uganda* is from Beaufort Books, NY, 2008, with an introduction by Dame Elizabeth Taylor has raised over one hundred thousand dollars to date for Ugandan AIDS orphans. Stanford University Library acquired his extensive archive of over 1 million photographs and created the Douglas Menuez Photography Collection at Stanford University Library.

His new book, *Fearless Genius: The Digital Revolution 1985-2000*, was published in June 2014 by Simon & Schuster's Atria Books and is in production as a documentary film, TV series, immersive traveling exhibition and educational program. The first exhibition of *Fearless Genius* opened in Moscow at the Photobiennale in March 2012 and has since been continuously traveling worldwide with exhibits and lectures in China, Spain, France, the UK, and most recently at the Computer History Museum in Silicon Valley, which set a record for attendance. He serves on the Advisory Board of the Woodstock Center for Photography and divides his time between upstate New York and Manhattan.

SOLO EXHIBITIONS

- [The Computer History Museum](#) (Mountain View, CA): *Fearless Genius: The Digital Revolution 1985-2000*. July, 2014.
